

Fire Investigation Interviewing & Photography

This course is offered to prepare or reinforce good practices for conducting an informational interview with witnesses in fire investigation cases. This course does not cover interrogation techniques. The course covers how to prepare for an interview, how to identify interviewees factors that can affect a witness statement, and the use of visual aids in the interview.

The course also covers a familiarization of photography skills, utilizing your digital camera. For beginners or intermediate level students who have established forensic skills in fire scene investigations.
