511 2nd St Gypsum,
Co 81637](#)

Vehicle Fire Investigation Course

3-day course consists of 24 hours of tested instruction in determining origin and cause of motor vehicle fires and culminates in an investigation of a live burn vehicle fire scenario. Based on Chapter 26 of NFPA 921, topics will include vehicle investigation safety, fuel packages, ignition sources, and vehicle systems and identification. Included in the instruction is alive electrical demonstration showing how fuses, fusible links, and relays work, as well as real time failures such as overloads and shorts. Utilizing the team concept, students will have the opportunity to investigate a live burn, construct a report, and present their finding to the class.

CFITrainer.Net[®] Modules

- Motor Vehicles: The Engine and the Ignition, Electrical and Fuel Systems
- Motor Vehicles: The Transmission, Exhaust, Brakes and Accessory System
- Investigating Motor Vehicle Fires
